**Subject:** Senate amendment template responseq  
**Attachments:** All Senate Amendments DPH for Bureau comment.BID.xls

Dear all,

I am not expecting you all to be available to review this today, but am sharing it for your information and possible feedback.

We received the Senate amendments this morning and this template this afternoon. I have a 5:00 PM deadline, but have already weighed in on some of the immunization amendments in more depth for the purposes of informing the SW&M Committee last night (via EOHHS). Larry, these were two of the immunization assessment amendments, which I will forward under separate cover.

If you see this and have a moment, please search for "BID" to get through the length and look at the nine amendments we were charged with responding to. Please note that while I prioritized the two direct funding amendments (AIDS account and Lab/BID consolidated account), we cannot support any amendment which exceeds House 2.

Linda and Grace I took a brief crack at the lab account, but I defer to your judgement within our limited degrees of freedom on the Donnelly amendment.

The full text of the amendments is available online, but a painfully short description is included on the attached spreadsheet. Note that the last column is commentary for DPH use only.

Thanks.

Kevin
